

Your Name(s)

School/Group Name

What is your idea for the future of Health? It could be a physical device, an app, website or service, or it could be a campaign/initiative to raise awareness?

What Problem(s) does it solve and what are the benefits of your solution?

What technology would your idea incorporate? What data would you need? Would your idea need to use sensors?

Your Name(s)

School/Group Name

You could draw your invention, or a digital blueprint showing how it would work...
